

JUAN EMILIO RIVERO

WEB DEVELOPER

Enthusiast Web Developer who loves to deliver high quality, robust and scalable code, embracing good practices and patterns. I like to stay up to date with the latest news and techs about Web Development .

EXPERIENCE

Auravant

June 2023 - March 2024

Frontend Developer for an AgTech Startup, my main duties were developing extensions for third party agronomy related companies, helping with project estimations, helping to take Tech-Stack related choices and going through security protocols for the apps.

The tech stack i use is ReactJS, Typescript, TailwindCSS, React Router, React Query and Some UI Libraries (Material UI, Ant Design, Headless UI, Shadcn UI), Also used Node + Typescript + Express for some backend projects

Kindalab

March 2024 - Current

Frontend Developer for a Software Factory Startup, currently working in React, Typescript, Redux, Tanstack Table, Headless UI.

Developing new features and taking technical decision, doing Frontend code review and giving feedback. Used to work with Agile methodologies and international teams.
